

FUGIDA! (Go!) is the third and final part of the *Joga o Jogo* (Play the Game) cycle. This is the moment that relates to the starting pistol at the beginning of the race, where the dice are thrown and the cards for the future are dealt. The curatorial project is chaotic and the relationships between the works presented appear at first glance, random and meaningless; however, with a precise sensory experience, the exhibition points to other promising paths. Rui Horta Pereira was invited to develop educational programme aimed at secondary school students from the municipality's schools. At the same time, in collaboration with the Macinhata do Vouga Railway Museum, pieces from its collection are presented that evoke the memory of the region's metallurgical and railway industry.

The *Joga o Jogo* (Play the cycle begin with *Partida...* (Ready...), at the Museu das Artes in Sintra, between May and August 2025 and continued with *Largada...* (Steady...) at the Forum Arte in Braga, on display between September 2025 and January 2026.
